

VISION 2026 Expo Playbook

Three days in Stuttgart, one product debut, three distributor conversations.
What the team does hour by hour, which stands we walk, whom we meet, what it costs and what we must decide before Monday.

Event VISION 2026, Messe Stuttgart, Halls 8 & 10 Dates Tue 6 – Thu 8 Oct 2026, 09:00–17:00 Prepared 30 Sep 2026 · Lan Wu
Status v2 · six days to opening

00 Executive summary

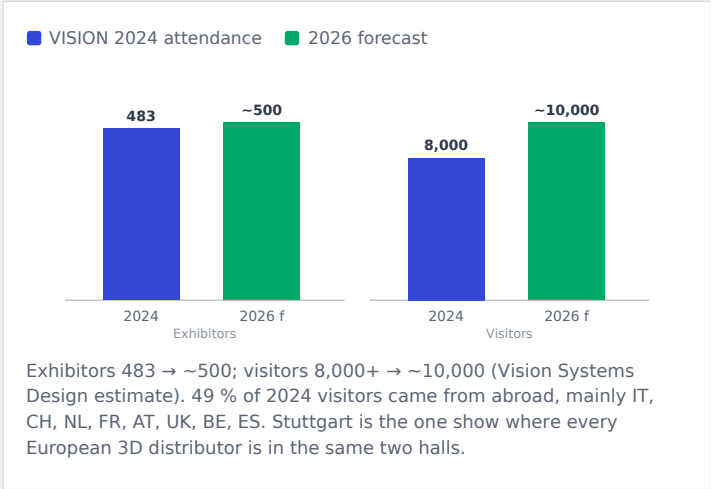

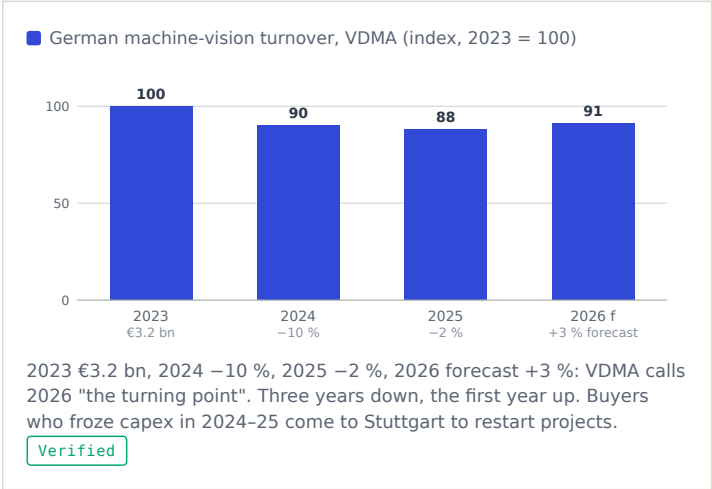

VISION 2026 is the first show after three years of contraction in the European machine-vision market, and the first where Chinese 3D vendors arrive in force. Big Frame goes in with five camera series, one debut (PRS-2500B, 1.3 to 3.6 m field of view), and one job: leave with parts in hand and three distributor letters of intent, not a bag of badges.

3 Show days Tue 6 – Thu 8 Oct, 09:00–17:00. Build-up Mon 5 Oct. Debrief Fri 9 Oct.	~500 Exhibitors forecast 483 from 38 countries in 2024, 67 % foreign. 2026 space over 90 % sold. Verified	~10 k Visitors forecast Over 8,000 in 2024, up 23 %, 49 % from abroad, 65+ countries.
22 Target stands, located 12 in Hall 8, 10 in Hall 10, plus 10 exhibitors still to locate on site.	19 Dealer candidates Across DACH, UK/IE, FR, IT, Benelux, ES, Nordics. 6 marked priority A.	€50–57 k All-in budget 30 m² system stand, four people. About €2,500–2,800 per part-in-hand lead at target. Assumption
OUTCOME 1 Three distributor LOIs by 30 Nov One DACH partner (Rauscher or MaxxVision, not both), one UK/IE, one third region. STEMMER is the long game, not a show outcome.	OUTCOME 2 Twenty part-in-hand leads A lead counts only with a real part, a named plant and a test date. Ten tests started, reported in the catalog format.	OUTCOME 3 PRS debut covered by three outlets imVEurope, Vision Systems Design, MVPro or inVISION. Release out Tue 09:30, live measurement on the hour.

Four decisions needed before Monday 5 Oct.

- Show the PRS-2500B physically with the baseline dimension declared "preliminary", or as renders and data only. Recommendation: physical unit, one honest footnote.
- Rauscher or MaxxVision as the preferred DACH partner if both ask for exclusivity. Recommendation: Rauscher (Photoneo DACH partner today, so they already sell structured light at our price band).
- List-price bands on the stand: yes or no. Recommendation: yes, mid-range band only, because the Chinese exhibitors around us will quote prices openly.
- Which repeatability definition we print on the PRS one-pager (1 σ, region, target, distance). Without it every comparison in section 05 is unfair to us.

01 Why this show, why this year

Europe's 3D segment grows faster than the market

Europe 3D machine vision about USD 2.07 bn in 2025, 11.4 % CAGR to 2033, Germany the largest country, UK the fastest. Whole European MV market 7.3 % CAGR. Analysts disagree on absolute size; the direction is consistent.

Inference

Chinese vendors arrive together, on price

Hikrobot, Huaray/iRAYPLE (8E20), Daheng, Mech-Mind GmbH, SinceVision (8A30) and several Shenzhen firms are on the exhibitor list. Yole: Chinese firms expand abroad "leveraging a significant price advantage" and are "putting pressure on prices". If Big Frame stands next to them without a technical story, we are read as one more price player.

Verified

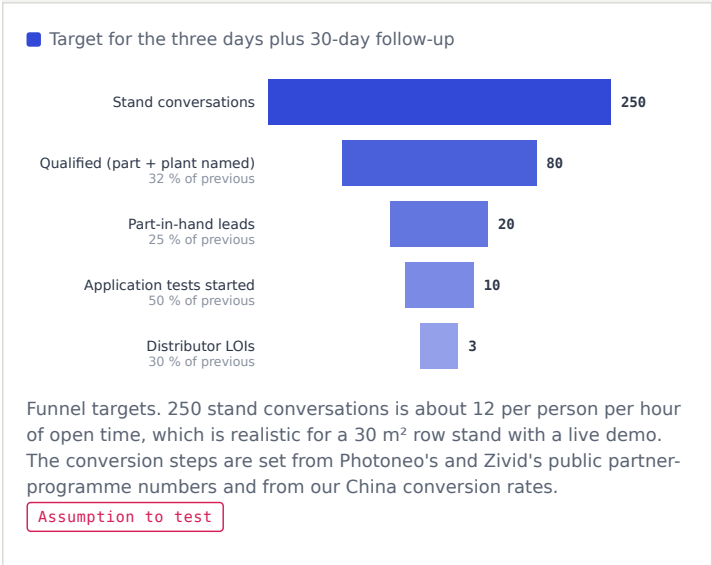

Nobody's repeatability figure means the same thing

Zivid quotes 1 σ point precision, Photoneo temporal noise plus calibration accuracy, Mech-Mind and LMI Z repeatability σ plus VDI/VDE 2634-2, IDS maximum deviation, SICK $\pm$ at 2 m. German buyers know this. The vendor who states the definition on the sheet wins the technical conversation.

Verified

Precedent. Zivid entered Germany through partner stands and a STEMMER agreement (2019) before it had a German office; Photoneo used Rauscher for DACH and Multipix for the UK, then showed live demos at VISION 2024 and was bought by Zebra in 2025; Mech-Mind opened Munich in 2019-21 and reached about 20 % overseas revenue by 2022 through integrator partners and an MVTec interface. All three sold through a European distributor first and hired later. Big Frame should follow the same sequence. Where the analogy breaks: those three had application references in Europe before the show. We have none yet, so the show has to produce them (Outcome 2).

02 Objectives and how they are measured

KPI	Target	Measured how	Read on
Distributor LOIs (DACH + UK/IE + one more)	3	Signed letters	30 Nov
Part-in-hand leads	20	Lead record with part, plant, test date	9 Oct
Application tests started	10	Test reports in catalog format	30 Nov
Press coverage of the PRS debut	3 outlets	Articles published	31 Oct
Competitor baseline filed	20 stands	Data sheet + repeatability wording + price band per stand	9 Oct
Booked meetings held	15 of 15	Meeting log (section 08)	9 Oct
Cost per part-in-hand lead	≤ €2,800	Invoiced cost ÷ leads	31 Oct

What the show is not for: closing orders, recruiting, or competing on stand size with Keyence, SICK or Zebra. A 30 m² stand with one live measurement and one honest data sheet beats a 200 m² stand with renderings.

Inference

03 Day-by-day schedule against the VISION programme

Four lanes: our stand, our floor walks, our booked meetings, and the published programme. Programme items are from Messe Stuttgart and VDMA; times marked "tbc" are not yet published and must be checked at the Industrial VISION Days forum (Hall 8, 8C70) on arrival.

Stand Floor walk Booked meeting Programme (Messe / VDMA) Programme, must attend

Tuesday 6 Oct · Day 1 · Debut day

Programme		09:00–17:00 Industrial VISION Days · Start-up of the Day · VISION Start-up 2026 named at close																

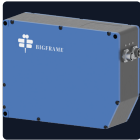

Mon 5 Oct, build-up. Stand build and power by 14:00 (loading slot booked via VisiFair, entry Gate 2). PRS bracket and pallet demo set up and measured three times; the three results are printed and pinned to the wall. Walk both halls once to locate the ten unlocated stands. Team briefing 17:00 (section 11).

Fri 9 Oct, debrief. 09:00–12:00 in the hotel: every lead assigned an owner and a promised date; competitor baseline filed; three decisions for 2028 written down; dealer shortlist ranked. Flights after 14:00.

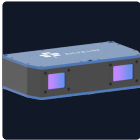

Five series, one sentence each, and the one claim we never make. The stand tells one story: repeatability you can measure on our stand, from 10 mm to 3.6 m field of view, at a mid-range price.

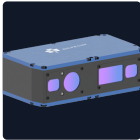

TRS • 4 models
FOV 9.8–74 mm • Z rep. 0.06–1 µm
Micro-structure inspection where a profiler is too slow: 26 M points per frame.
Do not say "accuracy". Say regional Z repeatability, 1 σ, and name the target.

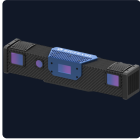

VRH9 • 7 models
FOV 24–277 mm • Z rep. 0.15–1.8 µm • 1.8 kg
Sub-micron class from 24 mm to 277 mm in one housing family. Against Micro-Epsilon surfaceCONTROL and wenglor MLAS.
Do not compare against Keyence VR-6000 (benchtop profiler, different job).

VR • 4 models
FOV 300–1,500 mm • Z rep. 2–100 µm • 1.6 kg
Bin picking and robot guidance at Zivid 2+ and Mech-Eye PRO working distances, lighter than both.
VR-600B is 14 µm and VR-1300B is 60 µm; the printed manual is wrong. Only the catalog Rev C figures go on the stand.

VRD • 2 models
FOV 580–1,166 mm • Z rep. 6–24 µm • 0.87 kg
Colour stereo for cobots and AMRs, under 900 g. This is the Motek-side product.
Do not position it against ToF (Helios2, blaze): different price tier and different job.

PRS-2500B • debut
FOV 1.3–3.6 m • WD 1.2–3.5 m • Z rep. 300 µm • 3.5 kg
Full pallet and full cage in one frame, RGB registered to the cloud, 638 nm laser. Positioned against Zivid 3 XL250, PhoXi XL and Mech-Eye DEEP / LSR L.
Baseline is "approx. 350 mm" and laser class is "stated at launch". Both go on the sheet as preliminary. Never quote "on request" for points per frame; say "5 MP stereo pair".

Stand storyline, in order

- 1 Live PRS measurement of a mixed pallet, on the hour, three captures, results printed.
- 2 The VR-1300B on the same pallet at 1.5 m: same software, finer grid.
- 3 VRH9-080B on a machined part under the table lamp: the sub-micron proof.
- 4 Catalog EN/DE handed over open at page 17, the all-models table.

PRS-2500B against the large-scene cameras it will be compared with on the floor

Camera	Working distance	FOV at far / focus	Stated Z figure	How the vendor defines it	Weight	Price	Stand
Big Frame PRS-2500B	1,200–3,500 mm	3,600 × 2,907 mm @ 3.5 m	300 µm	Z repeatability. Definition to be printed (decision 4).	3.5 kg	Mid-range band (decision 3)	ours
Zivid 3 XL250	1,500–4,000 mm	1,750 × 1,750 mm @ 2.5 m	250–265 µm	Point precision, 1 σ Euclidean, capture to capture, pre-filter	2.7 kg	Quote only	10E53
Photoneo PhoXi XL (Zebra)	1,680–3,780 mm	1,954 × 1,459 mm @ 2.3 m	400 µm / 500 µm	Temporal noise 1 σ on 80 % albedo / calibration accuracy 1 σ	1.2 kg	Quote only; family "≤ €20 k"	tbc
Photoneo MotionCam-3D L+	1,300–3,780 mm	–	550 µm	Temporal noise; accuracy 1.5–2.05 mm	1.15 kg	Quote only	tbc
Mech-Eye DEEP	1,200–3,500 mm	3,500 × 2,800 mm @ 3.5 m	1,000 µm @ 3 m	Z repeatability σ; VDI/VDE 2634-2 accuracy 3 mm	2.4 kg	Quote only	tbc
Mech-Eye LSR L	1,200–3,000 mm	3,000 × 2,400 mm @ 3 m	500 µm @ 3 m	Z repeatability; VDI/VDE 0.5–1.0 mm	2.9 kg	≈ €20 k excl. VAT (DE reseller)	tbc
IDS Ensenso C57-M	1,300–3,600 mm	–	200 µm @ 2 m	Z accuracy, maximum deviation	1.6 kg	≈ \$13 k (C57 family)	8C60

The PRS is the only camera in this set that matches Mech-Eye DEEP's field of view with a figure three times tighter and a weight closer to Zivid's. That is the debut sentence, provided decision 4 gives it a definition. Figures from vendor datasheets and reseller listings as of Sept 2026; prices are reseller, not manufacturer list. Verified for competitors, Reported for PRS.

05

Competitive positioning across the whole range

Vendor	Term on the datasheet	What it means	Cites VDI/VDE 2634-2	What we say at their stand
Zivid	Point precision (1 σ)	Euclidean distance variation of a point between consecutive captures, pre-filter, Lambertian target	No	"Same test, regional, on our stand at 11:00. Bring your part."
Photoneo / Zebra	Temporal noise (1 σ) + calibration accuracy (1 σ)	Noise on 80 % albedo surface; error over full range	No	Ask which figure the Rauscher demo used.
Mech-Mind	Z repeatability (σ) + VDI/VDE accuracy	Both at a stated distance, 2634 Part 2	Yes	Note their PRO S 50 μm @ 1 m vs our VR-1300B 60 μm @ 1.5 m: close, so lead with weight and price.
LMI Gocator	Repeatability Z + VDI/VDE accuracy	Snapshot sensor, 2634 Part 2	Yes	At Motek 6-211, not VISION. Ask about STEMMER pricing.
IDS Ensenso	Z accuracy	Maximum deviation at a distance	No	"Do you publish σ?" They do not for N/X series.
SICK	Measurement accuracy z + repeatability ±	At 2 m	No	Different tier; note price only.
Micro-Epsilon, wenglor	Repeatability z / resolution z	σ not stated in public material	No	Sub-micron peers for VRH9; ask what σ and target they use.
Big Frame	Regional Z repeatability	To be defined on the sheet: σ, region size, target, distance, captures	Commit to a 2634-2 / ISO 10360-13 test in Q1 2027	The offer: "we test yours on your part, one week, report in this format."

06

Marketing plan: a three-week campaign with three days in the middle

BEFORE · 30 SEP – 5 OCT

Six-day sprint

- **Wed 1 Oct** PRS press release and one-pager final (EN/DE). Embargo Tue 6 Oct 09:30.
- **Thu 2 Oct** Release to imVEurope, Vision Systems Design, MVPro, inVISION, Quality Engineering, MaschinenMarkt. Ask each for a 15-minute stand visit.
- **Thu 2 Oct** LinkedIn post 1: "Five series, 10 mm to 3.6 m, one stand". Company page + Lan + CEO.
- **Fri 3 Oct** Meeting invitations to all 19 dealers (section 10) and 6 partners (section 07) with a 30-minute slot proposal.
- **Sat 4 Oct** LinkedIn post 2: the PRS teaser, pallet render, no figures.
- **Mon 5 Oct** Catalog EN/DE (300 + 200), PRS one-pager (500), business cards (200 each) on the stand.

DURING · 6 – 8 OCT

One post per day, one demo per hour

- **Tue 09:30** Release live. LinkedIn post 3: PRS at the stand, first three captures pinned.
- **Tue-Thu** 20-second vertical video of each hourly measurement; best one posted at 18:00 each day.
- **Wed** Post from the VISION Award and VDMA panel: one sentence of opinion, tagged VDMA and Messe Stuttgart.
- **Thu** "Three things we learned" post, written by Lan, no product mention.
- Every conversation gets a lead card: part, plant, application, test date. No card, no lead.

AFTER · 9 OCT – 30 NOV

Every promise kept on its date

- **By 15 Oct** Every lead answered with exactly what was promised.
- **By 20 Oct** CEO recap: leads, LOIs, coverage, cost per lead.
- **By 31 Oct** Terms sheets to the three shortlisted dealers; second meetings booked.
- **By 30 Nov** Ten application tests reported in catalog format; LOIs signed or declined with the reason recorded.
- **By 15 Dec** EMVA membership filed; VISION 2028 stand decision; VISION Award 2028 entry noted (75 entries in 2026, €3,000 prize).

Asset	Owner	Status	Due
Product catalog 2026 EN and DE, Rev C	Lan / agency print	Done PDF built from code, VR figures corrected	print by 3 Oct
PRS-2500B one-pager EN/DE	Lan + product owner	Blocked on decision 4 (definition) and baseline	1 Oct
Press release + 3 renders + 1 video	Agency	In progress	1 Oct
Corporate deck, Big Frame design system	Lan	Done 20 slides	–
Stand graphics: one wall, one sentence, five products	Agency	In progress	2 Oct
Lead card (paper + form)	Sales engineer	In progress	3 Oct
Dealer terms sheet template	Lan + CEO	Open needs margin band and territory rules	3 Oct

Stand discipline that decides the numbers.

- Nobody sits. Nobody eats on the stand. Phones in hand only at the aisle.
- Every visitor is asked three questions in the first minute: what part, what plant, what does it cost you today when it fails.
- A promised follow-up date is a contract. It goes on the lead card in front of the visitor.
- Competitor stands: take the datasheet, ask the price band, write the repeatability wording. Do not photograph with a phone held up.
- German is spoken first at German stands; the catalog DE goes to any German-speaking visitor.

Collaboration plan: who makes Big Frame credible in Europe

Distribution is section 10. This is the ecosystem that has to say yes before a German plant buys a Chinese 3D camera: the software it plugs into, the standards it is tested to, the robots it guides, and the association that lists it.

SOFTWARE · HALL 8, 8C56

MVTec HALCON interface

Mech-Mind's fastest credibility gain in Germany was a HALCON acquisition interface. MVTec shows "HALCON with AI agents" this year and runs an Application Tour from 8C56. Ask for the third-party interface programme and a 2027 tour slot.

Inference

ASSOCIATION · HALL 8, 8E46

EMVA membership

STEMMER, Rauscher, phil-vision, FRAMOS, VA Imaging and NOTAVIS are all EMVA members; the dealers we want sit on its committees. Membership filed by 15 Dec. Ask on the stand about GenICam / GigE Vision conformance listing for the Big Frame SDK.

STANDARDS

A published test, not a claim

Commit publicly to a VDI/VDE 2634 Blatt 2 (and ISO 10360-13) characterisation of VR and PRS by Q1 2027, done by a German lab. Candidate: Fraunhofer IPA, Stuttgart, 15 minutes from the Messe; ask for a meeting Thu 10:00. This is the single cheapest way to remove the "Chinese numbers" objection.

Inference

ROBOTS · MOTEK HALLS

Cobot and AMR OEMs

VRD (870 g, colour) and VR are robot-guidance products; their buyers walk Motek, not only VISION. Wed 14:00–16:00 on the Motek side: Universal Robots partners, Fanuc, KUKA, Yaskawa integrators, LMI at Motek 6-211. Goal: two integrator evaluations.

LENSES AND LIGHTING · 10D56

Schneider-Kreuznach, Basler

A German-optics co-marketing line ("Schneider optics inside") is a credibility shortcut used by Hikrobot in 2019–20. Ask Schneider-Kreuznach for OEM lens supply on VRH9; ask Basler (8D50) how their Orbbec partnership is structured, since it shows Basler will partner on 3D.

MEDIA

Trade press as partners

imVEurope and Vision Systems Design run the pre-show previews everyone reads; MVPro runs "seven products" lists. A 15-minute stand visit each, with a measurable demo, is worth more than any ad. Offer an exclusive test-report series to one of them for 2027.

#	When	Who	Where	Goal	Preparation	Owner
TUESDAY 6 OCT						
1	11:00	STEMMER Imaging (Zivid, LMI, Orbbec)	10F16	Understand how they add a 3D line; long-game relationship, not an LOI	Know their Zivid agreement (2019) and MiddleGround ownership	Lan
2	13:00	MaxxVision (Hikrobot, Indutrade)	8C25	DACH candidate B: test whether they would add a second Chinese 3D line	Stuttgart-based, 14 staff; they know Chinese sourcing	Lan
3	15:00	EMVA	8E46	Membership process; GenlCam conformance	Conformance status of the SDK documented	Lan + product owner
4	16:00	Trade press (imVEurope / VSD / MVPro)	our stand	PRS demo on camera; interview	Release out 09:30; three printed captures on the wall	Lan
WEDNESDAY 7 OCT						
5	10:00	Rauscher (Photoneo DACH, Basler ToF)	their stand / ours	DACH candidate A: LOI conversation; Photoneo's move to Zebra is their risk	Terms sheet draft; VR vs PhoXi M comparison on one page	Lan + CEO (call)
6	12:00	MVTec	8C56	HALCON interface programme; 2027 Application Tour	SDK documentation; sample point cloud in HALCON format	Product owner
7	14:30	Integrators on the Motek side (2 slots)	Motek halls	Two VRD/VR evaluations	VRD sample in the bag; cobot bracket	Application engineer
8	15:30	phil-vision (Teledyne Z-Trak) or FRAMOS	tbv	Second DACH option; FRAMOS for OEM/embedded angle	Which lines they lack: no structured light at FRAMOS	Lan
9	16:30	Multipix or Clearview (UK)	our stand	UK/IE candidate; both carry Photoneo, so we are the Zebra hedge	UKCA status; price band	Lan
THURSDAY 8 OCT						
10	10:00	Fraunhofer IPA or Univ. Stuttgart ISW	our stand	2634-2 characterisation quote for Q1 2027	Test plan draft; two cameras offered on loan	Product owner
11	11:30	iMAGE S (IT) or Alliance Vision (FR)	our stand	Third-region candidate	Italian and French application notes from China references	Lan
12	13:30	Second meeting, priority-A dealer of the week	our stand	Verbal LOI, terms sheet handed over	CEO available by call	Lan
13	14:30	Schneider-Kreuznach	10D56	OEM lens supply for VRH9	Lens spec sheet	Product owner
14	15:30	VA Imaging (NL) or Sensor Partners	tbv	Benelux candidate	—	Sales engineer
15	16:30	Messe Stuttgart project team	organiser office	2028 stand options; guided-tour inclusion	Visitor count on our stand, three days	Lan

Stands marked tbv are exhibitors on the provisional list whose 2026 stand number was not published at the time of writing; locate them on Monday's walk. Invitations go out Fri 3 Oct; unconfirmed slots are filled from the dealer list in priority order.

Twenty-two located stands in walking order, two halls, two half-days. Boards are schematic, ordered by stand code, not to scale. Priority 1 stands (blue) get a 15-minute visit with the question written on the card; priority 2 (green) get the datasheet and the price band.

Hall 10 Tue 10:00-12:00 · 3D cameras and sensors

10C30 Micro-Epsilon surfaceCONTROL 3D 3560 on-sensor evaluation. Ask: σ and target for "0.25 μ m repeatability z".	10D30 ifm New O3R platform. ToF tier, price band only.
10D56 Schneider-Kreuznach OEM lenses for VRH9. Meeting 13, Thu 14:30.	10E40 LUCID Vision Labs Helios2 Chroma RGB-D family, \$1.5 k ToF. Watch how they sell colour + depth.
10E53 Zivid Zivid Motion live on a UR robot with 2+ MR130. Ask the path-planning price; note the demo format, copy it.	10E55 AT Sensors C6/C7 profile sensors, 140 kHz. Profiler peer for TRS.
10F16 STEMMER Imaging Meeting 1, Tue 11:00. Zivid, LMI, Orbbec on one stand: see the 3D shelf.	10F30 Allied Vision (+ Chromasens) 3DPIXA evo line-scan 3D. Consolidation story since Jan 2026.
10G79 Leopard Imaging Sirius Max RGB + iToF. Embedded tier.	10H82 Ubicept (start-up) Photon-level imaging. Five minutes, curiosity only.

Still to locate on Monday's walk (on the exhibitor list, stand not published)

Zebra / Photoneo · Mech-Mind Robotics GmbH · SICK (Nova platform, new 3D AI tools) · Keyence Deutschland · Hikrobot · Daheng · Rauscher · phil-vision · FRAMOS · Photonfocus · Baumer Optronic. Cognex, SmartRay, Orbbec and Percipio have no confirmed 2026 presence. LMI Gocator exhibits at **Motek, stand 6-211**, not at VISION.

Hall 8 Tue 14:00-16:00 · Software, cameras, forums

8A30 SinceVision Chinese profiler debut (SRI6000), five live stations. See how a Chinese peer stages a debut.	8B10 Teledyne Z-Trak2 profilers; 100 Gbit/s platform. phil-vision carries Z-Trak.
8C25 MaxxVision Meeting 2, Tue 13:00. Hikrobot's DACH distributor.	8C50 Scientific VISION Days AIT forum. Check the timetable once.
8C56 MVTec Meeting 6, Wed 12:00. HALCON + AI agents; Application Tour start.	8C60 IDS New Ensenso N, Nion ToF with RGB. Ask whether they now publish σ .
8C61 wenglor MLAS / ShapeDrive, uniVision 3. VRH9 peer, 2-2.5 kg vs our 1.8.	8C70 Industrial VISION Days VDMA forum. VISION Award Wed, VDMA panel Wed 13:00, daily start-up pitches.
8D50 Basler "Full-line provider"; 2D+3D for AMRs; Orbbec partnership. Ask how a 3D partner gets in.	8E20 Huaray / IRAYPLE Sells direct in Europe on price. Note their stand size and staffing.
8E46 EMVA Meeting 3, Tue 15:00. Membership, GenICam.	8E60.19 Phaseform (start-up) Adaptive optics. Curiosity only.

Wed 09:30-11:00 · the Chinese peer walk

Hikrobot, Huaray (8E20), Daheng, Mech-Mind, SinceVision (8A30). Purpose is not product; it is to record stand size, staffing, whether prices are quoted openly, which distributors' badges appear at their stands, and how European visitors react. This becomes the first page of the 2028 stand decision. Inference

Nineteen candidates in seven regions, ranked by fit: do they already sell structured-light 3D in our price band, do they lack a Chinese line, and are they big enough to carry demo stock and application support. Priority A means an LOI conversation at the show; B means a first meeting; C means a card and a catalog.

Pri	Company	Base	Size · owner	3D lines carried today	Fit for Big Frame	Conflict	At VISION	Action
DACH								
A	Rauscher	Olching, DE	~28 staff · €13.5 m · private	Photoneo (DACH), Basler ToF, Nerian stereo	Sells structured light at our band; Photoneo now inside Zebra creates a hedge motive	High (Photoneo)	listed, stand tbc	Meeting 5, LOI
A	MaxxVision	Stuttgart, DE	~14 staff · Indutrade	Hikrobot (incl. 3D)	Knows Chinese sourcing and logistics; small, needs demo stock from us	Medium (Hikrobot)	8C25	Meeting 2
B	phil-vision	Munich area, DE	private · EMVA member	Teledyne Z-Trak profilers	No snapshot structured light: gap we fill	Low	listed, stand tbc	Meeting 8

C	beVision	EU (Zivid EMEA)	—	Zivid	Zivid house	High	visitor	Card only

Terms we walk in with

Distributor margin 25–35 % off list (industry inference from Photoneo and Mech-Mind reseller pricing, not a quoted figure); demo stock of one VR and one VRD on consignment for six months; application support from Suzhou within 48 hours; territory non-exclusive for year one, exclusive on volume. Assumption to test

The one rule

One DACH partner, not two. Rauscher and MaxxVision both selling us in Germany produces a price war on our own product in year one. Decision 2 picks one; the other gets Austria or Switzerland if they want it.

Direct accounts stay direct

Mech-Mind GmbH (Germering) and Hikrobot Europe (Hoofddorp) sell direct with local staff. We are not there yet: no European service, no spares. Until a service partner exists, every European lead goes through a distributor, including the ones we meet ourselves at the show.

11 Team briefing: roles, talk track, what not to say

ROLE 1

Lan Wu · lead

All 15 meetings, press, dealer terms. Off the stand 60 % of the time. Carries the terms sheet and the corporate deck.

ROLE 2

Application engineer

Runs the hourly PRS measurement and every "bring your part" capture. Owns the printed results wall. Motek integrator visits Wed afternoon.

ROLE 3

Sales engineer

Stand front, lead cards, catalog hand-over, competitor datasheet filing. Never leaves the stand unstaffed with fewer than two people.

ROLE 4

Product owner (China side)

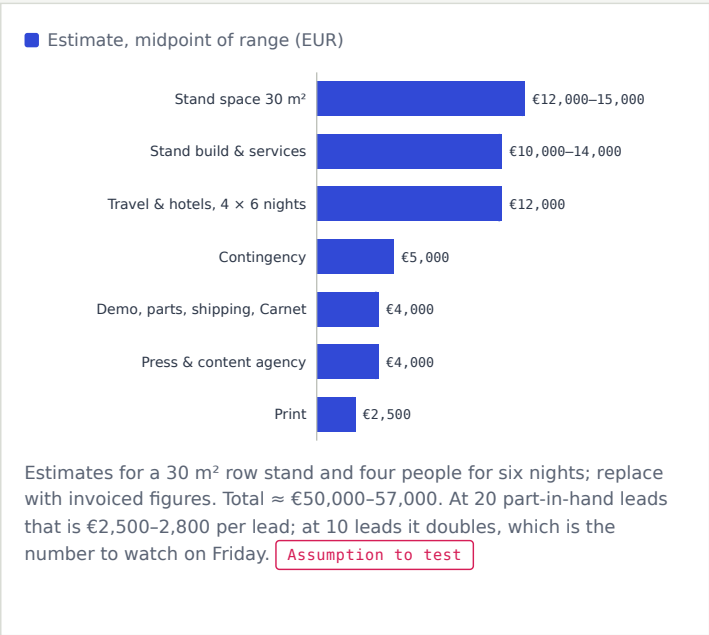

PRS questions, TridiVision software demo, HALCON and Schneider meetings, standards test plan. Owns the "preliminary" footnotes.

The 60-second talk track

- "Big Frame makes structured-light 3D cameras from 10 mm to 3.6 m field of view. Five series, one software."
- "We publish repeatability, not accuracy, and we measure it on the stand. Here are this hour's three captures."
- "What is the part, which plant, and what does a miss cost you today?"
- "We test your part in Suzhou within a week and send a report in this format." Hand over the catalog open at page 17.
- Write the lead card with the visitor watching. Agree the follow-up date out loud.

Words we do not use

- "**Accuracy**", "**high-precision**": we say repeatability and name the definition.
- "**Cheaper than Zivid / Photoneo**": we say "mid-range list price, published".
- "**Beyond Vision**" more than once on any surface, and never as a stacked lock-up.
- "**Big Frame**" in artwork: the wordmark is BIGFRAME; the text is Big Frame.
- Manual figures for VR-600B / VR-1300B**: 14 µm and 60 µm only, catalog Rev C.
- Any spec of the PRS marked preliminary** stated as final.

Line	Estimate (EUR)	Note
Stand space, 30 m² row stand	12,000–15,000	Messe Stuttgart rate card; confirm invoice
Stand build, furniture, screen, power, lighting	10,000–14,000	System stand; no custom build in year one
Travel and hotels, 4 people, 6 nights	12,000	Stuttgart rates triple in show week
Contingency	5,000	—
Demo: pallet, parts, PRS bracket, shipping five cameras	4,000	ATA Carnet for the cameras
Press and LinkedIn content (agency)	4,000	Release, kit, three videos
Print: catalog EN/DE, PRS one-pager, cards	2,500	—
Total	≈ 50,000–57,000	≈ €2,500–2,800 per part-in-hand lead at target

Status	Claim	What would falsify it	Owner · by
Verified	Dates, hours, halls, forum 8C70, ~500 exhibitors, 2024 baseline, VDMA panel Wed 13:00–13:40, VISION Award finalists, all stand numbers in section 09	Messe exhibitor directory on arrival	Sales eng. · 5 Oct
Unconfirmed	VISION Award ceremony at 11:00 Wed; Start-up Happy Hour time; guided-tour times; build-up on Mon 5 Oct	Forum timetable at 8C70; VisiFair slot confirmation	Lan · 2 Oct
Reported	PRS-2500B figures (right-hand column of PRS_spec.xlsx); baseline ≈ 350 mm; laser class	Engineering sign-off on baseline and laser class before print	Product owner · 1 Oct
Assumption	Team of four; 30 m² stand; €50–57 k budget	Stand contract and travel bookings	Lan · now
Assumption	Funnel: 250 conversations → 80 qualified → 20 parts → 10 tests → 3 LOIs	Friday lead count below 12 means the demo or the stand position failed, not the market	Lan · 9 Oct
Inference	Distributor margin 25–35 %; Rauscher over MaxxVision; one DACH partner only	Rauscher declines or demands exclusivity beyond DACH	Lan + CEO · 30 Nov
Inference	A German 2634-2 test removes the "Chinese numbers" objection	Two priority-A dealers say the test does not matter to their customers	Product owner · 8 Oct
Risk	GenlCam / GigE Vision conformance and CE documentation not ready for a German buyer	EMVA meeting Tue 15:00 confirms what is missing	Engineering · 5 Oct
Risk	No European service or spares: a lead asks "who repairs it in Germany?"	Answer is the distributor; if no LOI by 30 Nov, the question stays open	CEO · 30 Nov
Risk	Chinese peers quote prices openly and we are read as one of them	Stand position next to a Chinese cluster; check Monday, request a move if so	Lan · 5 Oct

The 30 days after 9 Oct

- 1
- 9 Oct Debrief; every lead assigned; three decisions for 2028 written down.
- 2
- 15 Oct Every lead answered with what was promised.
- 3
- 20 Oct CEO recap: leads, LOIs, coverage, cost per lead.
- 4
- 31 Oct Terms sheets to three dealers; second meetings booked.
- 5
- 30 Nov Ten tests reported; LOIs signed or declined with the reason.
- 6
- 15 Dec EMVA filed; 2634-2 lab booked; VISION 2028 decision.

Decisions required from Lan and the CEO

- 1
- PRS shown physically with preliminary footnotes, or renders only.
- 2
- Rauscher or MaxxVision as the single DACH partner.
- 3
- List-price band on the stand, yes or no.
- 4
- The repeatability definition printed on every sheet.
- 5
- Budget ceiling: €57 k or a lower cap that changes the stand.

To make this more precise I need: the stand contract (hall, number, m²), the travelling team, current list prices, conformance status, and any existing contact with the dealers named above.

Research was done 29–30 Sep 2026 from published pages and press previews; several organiser and vendor sites could not be opened directly from this environment, so those facts rest on the cited page's search snippet and are marked unconfirmed above.

Show and programme. Messe Stuttgart, VISION: Industrial VISION Days; Start-up World; Guided tours; Review 2024; One ticket six expos; Set-up and dismantling. VDMA, VISION page (panel Wed 7 Oct 13:00–13:40). Novuslight, "VISION 2026 on track" (≈80 presentations, Happy Hour). MVPro, "VISION 2026: reset, rebuild, return to growth" (~500 exhibitors, Asian presence). Vision Systems Design, "VISION 2026 Stuttgart preview" (~10,000 attendees, ~470 exhibitors). imVEurope and MVPro, VISION Award 2026 shortlist. Optics.org, press round-table.

Exhibitor launches. Vision Systems Design and Zivid blog (Zivid Motion, 10E53); RoboticsTomorrow (Basler 8D50; MVTec 8C56); MVTec events page; LUCID (10E40); Automate.org (IDS 8C60; SinceVision 8A30); ifm events (10D30); Teledyne press (8B10); Allied Vision events (10F30); AT Sensors; Leopard Imaging (10G79); MVPro "Seven new products" and "Six start-ups"; Messe Stuttgart provisional exhibitor list; Zebra press release (Photoneo acquisition); Mech-Mind news (ULTRA M-GL); LMI event page (Motek 6-211); Orbbec press (Basler partnership).

Market. Vision Systems Design and imVEurope on VDMA machine-vision turnover 2023–2026; VDMA economic situation; Yole, "Adapting strategies: industrial machine vision"; Grand View Research and MarketsandMarkets, Europe 3D and total MV; IFR World Robotics 2025 and 2026 (Germany); Clearview Imaging, "Machine vision suppliers Europe".

Competitor figures. Zivid datasheets 2+ M60/M130/L110 and 3 XL250; Zivid support FAQ (precision definition); Photoneo product pages PhoXi S/M/L/XL, MotionCam-3D M+/L+ and Photoneo wiki (definitions); Mech-Mind docs NANO, PRO S/M, UHP-140, DEEP, LSR L; IDS Ensenso S, C57, B57, N/X pages and 1stVision; SICK Visionary-S datasheet; LMI Gocator 3210 and 3506; Micro-Epsilon surfaceCONTROL 3D 3200/3510; wenglor MLAS; LUCID Helios2; Basler blaze; ifm O3D303/O3R225; Keyence VR-6000 and LJ-X8000; Orbbec Gemini 335; Hikrobot MV-DB500S. Prices: Unchained Robotics (Mech-Mind EUR), Axis NE (Gocator), VA Imaging (Ensenso C57), Graftek, Edmund Optics, Digi-Key, Basler shop, Motionworld, Qviro and Relling Systems price guides.

Standards. VDI/VDE 2634 Blatt 2 and 3 (VDI, DIN Media); ISO 10360-13:2021; NIST and ScienceDirect comparison of 2634-2 and 10360-13; EMVA 1288 (2D only).

Channel. Company pages and EMVA member list for STEMMER Imaging, Rauscher, MaxxVision, phil-vision, FRAMOS, Polytec, NOTAVIS, Multipix, Scorpion Vision, Clearview, Alrad, OEM Automatic, ADPIX, Alliance Vision, Elvitec, iIMAGE S, Reg Technologies, Basler Italy, beVision, Infaimon, Vision Advisor, Tecnodrive, VA Imaging, Sensor Partners, Data Vision; Mech-Mind GmbH and Hikrobot Europe company registrations; Zivid-STEMMER 2019 agreement; Photoneo partner announcements (Rauscher, Multipix).

Big Frame. Product Catalog 2026 EN/DE Rev C (built from data/models.json); PRS_spec_2026-09-30_v2.xlsx; VR-600B 14 µm and VR-1300B 60 µm as confirmed by Lan Wu, 30 Sep 2026.
